## INTRODUCTION

It seems sufficient that only a short provisional introduction should accompany this first volume of the Coffin Texts. A complete introduction demands a separate volume; and such an introductory volume containing a list of all the originals used, a discussion of their peculiarities, a paleography, a list of spells and the order in which these occur in the individual manuscripts—in short, all the information which may be useful to the student of the text volumes or is important in itself—will be compiled in the course of the preparation of the text volumes and can be published only when these are out. The purpose of these few introductory pages is merely to explain and justify the scope and arrangement of this publication and to take the earliest opportunity of expressing our deep gratitude to all those who have laid us under obligation during the long years in which the widely scattered materials for this work were being collected.

Although the nature of the Coffin Texts makes it probable that they will not be welcomed with joy by all Egyptologists, nobody will deny the importance and necessity of the task undertaken here. These texts constitute the largest body of Egyptian texts not yet published and form the missing link between the Pyramid Texts and the later Book of the Dead. They must needs claim the attention of lexicographer and grammarian as well as of the student of religion and thought; for, whether they please us or not, they are an expression of the Egyptian mind and therefore afford valuable evidence indispensable to a proper knowledge of the Egyptian mental atmosphere.

The history of the enterprise has been set forth by Professor Breasted in chapter vii of his book on *The Oriental Institute*.<sup>1</sup> The first scholar to contemplate an edition of the Coffin Texts was M. Lacau, who had compiled the catalogue of the Cairo material. He made a beginning in the *Recueil de travaux* for 1904, and his series of articles continued intermittently down to the time of the World War. At the conclusion of this M. Lacau was appointed director-general of the Egyptian Service des Antiquités, and it became apparent that henceforth he would have but little time to devote to so exacting an undertaking. The project of a complete edition now began to germinate independently in the minds of two scholars, one in America and the other in England. Professor Breasted had conceived the plan of both copying by hand and photographing all existing Coffin Texts, while Dr. Gardiner merely thought of continuing the work along the lines started by M. Lacau, with the difference that the texts should henceforth be published in autograph and in vertical columns. Professor Breasted and Dr. Gardiner have alike acknowledged that they had seriously underestimated the extent and difficulty of the task, and it was a happy circumstance that enabled them to pool their plans and to devise in common a scheme of work which combined the advantages of photography and hand-copying. The financing of the enterprise was undertaken by the Oriental Institute. M. Lacau at first consented to lend his assistance as a third editor, but after various meetings in which the general order of procedure was discussed it became plain that his administrative duties would not admit of his active participation in the work. Having most generously placed all his copies and notes at the disposal of the other two editors, he therefore withdrew from their number. It is largely due to M. Lacau's interest that such splendid facilities were given for the work in the Cairo Museum, a special gallery being set aside for the purpose. His copies have, moreover, proved quite indispensable, not merely on account of their great accuracy, but also be-

<sup>1</sup> "The University of Chicago Survey," Vol. XII (Chicago, 1933).

## INTRODUCTION

cause the originals had in many cases gravely deteriorated since they were made. In some cases they provide our sole witness to a text.

A start was made with the actual copying in 1922/23, Professor Breasted and Dr. Gardiner being assisted for this season only by Dr. Ludlow S. Bull, who was mainly occupied in listing the coffins and classifying M. Lacau's materials—a piece of work that has been invaluable at all stages. In 1923/24 the copying was much interrupted by the discovery of the tomb of Tutenkhamon, and with Professor Breasted's increasing obligations it became clear that he would have to retire from the actual work. Though he thus withdrew as editor, Professor Breasted continued his co-operation in other respects, giving much time and thought to the scheme whenever difficulties had to be overcome or problems to be settled. And as to the material side of the enterprise, it is of course unnecessary to say that without the resources of the Oriental Institute an undertaking of these dimensions would have been impossible.

In the next season I was engaged as assistant to Dr. Gardiner, since the task was obviously too large for one man to undertake single-handed. From that time onward the enterprise has been practically confined to Gardiner and myself. As Gardiner likewise became increasingly obliged to give the larger part of his time to other tasks, we soon developed the arrangement that I should copy the texts in Cairo and in Europe and he should check over my results at intervals. During the last few years the work has rested solely in my own hands, and indeed the physical circumstances demanded that the final editing should be in the hands of a single person working continuously in one and the same place. Hence it has come about that I appear alone as the actual author of this book, though Dr. Gardiner remains associated with me as co-editor of the entire enterprise. Although in his opinion my share is so preponderating that this position has become inevitable, it must here be stated how much the work owes to him. Not only has he collated the majority of the texts, but also the actual appearance and arrangement of the publication are the outcome of our joint thought and discussions, not to mention the more personal matter of how greatly his encouragement has helped me to persevere in an often tedious task.

Besides the scholars already mentioned, it is here necessary to place on record the names of others to whom in one way or another gratitude is due. A few coffins were copied from photographs by Dr. R. Anthes and Dr. T. G. Allen, the latter having a further claim to our gratitude as editorial secretary of the Oriental Institute. The late Mr. J. Hartman performed a most useful function in photographing the larger part of the Cairo coffins during the first season. But above all we acknowledge the kindness shown to us by the directors of the various museums in possession of the materials which we needed. In Cairo, where by far the greatest number of coffins is found, we had the unflinching assistance, apart from M. Lacau himself, of Messrs. Quibell, Lefebvre, Gauthier, and Edgar, and subsequently of Messrs. Engelbach and Gunn. At the British Museum the late Dr. H. R. Hall and Mr. Sidney Smith afforded every facility, as did also the late M. Bénédict and M. Boreux at the Louvre, Professor Schäfer at Berlin, the late Professor Schiaparelli at Turin, M. Capart at Brussels, Dr. Leeds at the Ashmolean Museum at Oxford, Mr. Dows Dunham at the Museum of Fine Arts in Boston, Mr. H. E. Winlock at the Metropolitan Museum of Art in New York, and Dr. L. S. Bull at New Haven (Yale).

Not only have the aforementioned placed all their material, much of it unpublished, at our disposal, but they have also made the work as pleasant and as easy as circumstances would allow. It must be remembered that among the coffins studied are some of a size and weight altogether out of proportion to the students' rooms where most tasks of this kind have to be done. To one and all of the many who have shown such patience with us and our exacting demands we tender our heartfelt thanks.

## INTRODUCTION

xi

It seems superfluous to explain here the details of the arrangements for the copying of the texts. The plan was adopted at the very beginning of the enterprise and proved so practical that we were able to adhere to it down to the very end. The reader interested in the particulars may be referred to the chapter devoted to the Coffin Texts in Breasted's above-mentioned book. Suffice it here to state that one of the principles early adopted and faithfully observed was that no text should be regarded as properly copied unless it had been collated by at least two persons. As was explained above, this means that in the vast majority of cases the texts were copied by me and collated by Gardiner and then again by myself. It was only toward the end of the copying that there was some deviation from this principle, especially in the case of the coffins in America. These were copied from photographs and afterward collated with the originals by the present writer. Another valuable means of testing our copies was found in previous publications of certain texts and above all in M. Lacau's manuscript. The introductory volume will afford an opportunity of stating exactly what sources and means of control were available in each individual case.

Although the method described above seems to reduce error to a minimum, I have had the humiliating experience that complete avoidance of mistakes is apparently impossible. A collation of the final text with the photographs has disclosed at the last moment a certain number of obvious mistakes. Of course only indubitable mistakes (omissions of signs and the like) have been corrected at this stage of the work; in doubtful cases the photographs, in which mere fortuitous patches of color or the grain of the wood have often a misleading resemblance to actual signs, have never been trusted against our copies from the originals.

A little more must be said to explain the arrangement of the publication as it was finally settled. Broadly speaking we found in our materials three groups of texts: Pyramid Texts, earlier versions of spells already known as chapters of the Book of the Dead, and new spells, that is, spells not (or not yet) known to belong to these two groups. As regards the division into these three groups, it may be said that it has been proved both practical and possible to separate the bulk of the Pyramid Texts occurring in our coffins from the rest; for the majority of these Pyramid Texts, nearly always the same spells or groups of spells, form a distinct body of texts, a foreign body clearly different from the other spells. The publication of these later copies of the Pyramid Texts has been reserved for later. Only such Pyramid spells as occur among the other texts or as part of a regular series of non-Pyramid spells have been incorporated into the present volumes of Coffin Texts proper. With the spells belonging to the later Book of the Dead the situation is different. The relation is here much closer, and they cannot be separated from the rest so easily or without cutting to the quick. In the first place it sometimes happens that only one part or subdivision of a spell or series of spells which forms a unit in the Coffins has survived in the later Book of the Dead. A striking example is found in the series of spells studied in Sethe's *Göttinger Totenbuchstudien*:<sup>2</sup> the order of the spells belonging to this series in the Coffins is very different from that in the Book of the Dead, in which, moreover, one spell has disappeared. It would be obviously absurd to adopt for the Coffins this later order and to separate the spell which was not incorporated into the later Book of the Dead from the other spells. Another example of the same kind occurs in the present volume, as is shown by a comparison of our first series of spells and chapter 169 of the Book of the Dead. In the second place some chapters of the Book of the Dead are compilations of originally independent texts. For example, chapter 28 of the Book of the Dead is never found in the Coffins as one spell but exists there only as three independent spells; these, moreover, usually belong to different groups. In this case we must clearly publish these texts as separate spells, and within the series to which they belong in the Coffins, not as the later unit which for some reason they

<sup>2</sup> In *Zeitschrift für ägyptische Sprache und Altertumskunde* LVII-LIX (1922-24).

have become in the Book of the Dead. Sometimes the reverse situation occurs: chapters 69 and 70 of the Book of the Dead are always one in the Coffins and must be given as such. In the third place any new, full copy of a Book of the Dead may prove our distinction to be wrong by containing a spell from the Coffin Texts not known hitherto in the Book of the Dead. The papyrus of Nu, for example, is our sole evidence for the existence of several Coffin Text spells in the New Kingdom. On the other hand, any new coffin may contain an earlier version of a chapter of the Book of the Dead of which we do not possess a copy in the Coffins at the present moment. We have little reason to think that our material, vast as it is, comprises all the spells circulating at this period. Nearly every new coffin has yielded one or more unknown spells; it was, for example, only in one of the last coffins I copied that I found our first copy of chapter 14 of the Book of the Dead. For all these reasons no distinction has been made between Coffin Texts and Book of the Dead. A complete concordance of the Coffin Texts with the Book of the Dead and the Pyramid Texts will be given in the introductory volume alluded to above. Meantime a provisional list of this sort will be given with each volume as it appears.

As to the order in which the spells are published, this is largely dictated by practical reasons, though several more scientific and theoretically more attractive possibilities have been considered. One possibility was to try an arrangement according to subject, that is, to collect group by group all the spells concerned with food, transformations, etc. But a serious difficulty is that more often than not it is impossible to assign a spell to a clear subject group. At all events this system, which has many undeniable advantages, would have demanded a prolonged study of the texts which would have withheld the Coffin Texts for many more years from an impatient world.

Another possibility was to classify our spells according to the position in which they are habitually found in the coffins, for some spells regularly occur on the head, others equally regularly on the foot or on the back, etc., and it is often clear from their contents that there is an inherent reason for this position. However, the number of spells belonging to this class is much too small to yield a principle of arrangement for all the spells.

A third possibility was the course taken by Sethe in his *Pyramidentexte*.<sup>3</sup> That is, we might have given all the texts of one coffin accompanied by their parallels, then the remaining texts of a second coffin, etc. This, however, would often have spoiled the natural serial grouping found in some coffins but absent in others. Sethe chose this method because it gave precedence to the most ancient text. For us who had to arrange undated material this method had little attractiveness. If our arrangement had to be arbitrary, we had little reason to prefer the capriciousness of an ancient scribe to our own. Our tendency has been to publish first those spells of which there are many parallel texts, and by preference those which belong to a larger series. Often, however, it is the merest chance or a momentary predilection which has determined my choice.

The division into spells itself is a problem of which many readers might prefer a solution based on more scientific principles than those here followed. As a rule a unit marked out as such by a sign of division at the end in one or more manuscripts has been numbered by me as a separate spell; in other words, a spell in our publication is usually the smallest unit found in any of the manuscripts in which its text is included. Some of these spells may later prove to be only subdivisions of a larger unit, which would then be recognized as the real spell. Or, conversely, although a mark of division is absent in *all* manuscripts, a spell might be an aggregation of many independent elements. Only a thorough study of a text (which, as stated above, would have postponed the publication of the texts perhaps to the Greek calends) could put the

<sup>3</sup> *Die altägyptischen Pyramidentexte* . . . neu hrsg. und erläutert von Kurt Sethe (4 vols.; Leipzig, 1908–22).

## INTRODUCTION

xiii

student in a position to solve such problems as these, which are the more difficult because most of the spells are extremely formless compositions without any proper development of a theme or any clear conclusion. Here again a final decision must be the result of a further study of the texts, and for the moment our course has been determined by the purely practical consideration that in the future it will be easier to operate with our small units than with long spells which it might become necessary to subdivide into *a*, *b*, *c*, etc.

Let us now turn to the arrangement of our pages. The texts are given in parallel vertical columns. The use of vertical columns was of course dictated by our determination to preserve in all cases the direction and relative position of the signs as found in the originals. The advantages of this method are obvious. A publication in horizontal lines of originals written in vertical columns conceals all the variations in the position and arrangement of words and signs. How important these may be is seen from Sethe's comprehensive study of such phenomena in a separate volume of his edition of the Pyramid Texts. Much of the work done by Sethe in compiling that volume will be avoided by our own arrangement, which puts the whole material before the student from the outset. Another advantage is that it is more likely to give the student an approximately accurate idea of what a lacuna might have contained. Great care has been taken to show these gaps in their actual size in proportion to the preserved parts of the same manuscript. It should, however, be borne in mind that the variations of spelling, as well as in the size of the individual signs in the same manuscript, are often so great that it is impossible to be sure how a lacuna of any length should be restored. It is absolutely impossible to reconstruct whole lines or sides of our manuscripts, as Sethe has done for some parts of the Pyramid Texts, if only a few fragments are left. For this reason the estimated length of long lacunae is always to be accepted with some reserve. Restorations have only very rarely been admitted to the main text. This has in fact been done only when the restoration cannot be immediately ascertained from the parallel texts, or when it is important for the question as to which version a manuscript belongs to. If restorations are inserted in the text, they are of course inclosed in square brackets.

One deviation from our principle of reproducing the original as faithfully as possible was unavoidable. Many of our manuscripts are written in real, sometimes even rather cursive, hieratic. For the sake of uniformity and clearness this has been transcribed. Transcription is, however, in many ways a disadvantage, though attempts will be made to remedy it by a paleographic section in the introductory volume, which will also indicate in the case of each individual coffin the kind of script used in it. Facsimiles of rare signs or signs of doubtful transcription will sometimes have been given already in the notes of the text volumes. In our method of transcription we have adhered to the principles set forth by Gardiner in *Journal of Egyptian Archaeology* XV (1929) 48 ff. Being convinced of the importance of the *reproductive* function of transcription, we have not tried to hide the hieratic form of the original, but have welcomed every opportunity to make the veil of transcription as thin as possible. Thus we freely use 𐀀 for 𐀀, 𐀁, 𐀂; 𐀃 or 𐀄 for 𐀅 or 𐀆 of the manuscripts; 𐀇 if a clear ligature 𐀈 is followed by a second 𐀉; etc. The introductory volume will be the right place to explain our conventions in more detail. A great difficulty in this respect is that our hand copies, being the product of many hands and long years of work, are not at all consistent in this matter. An attempt has been made to attain a higher degree of consistency by the help of the photographs. Where these failed I have kept the transcription of our hand copy. The consequence of this procedure is that, for example, a 𐀀 in *rdi* or *imy* can be trusted to reproduce the manuscript exactly, but not a 𐀀 in *rdi* or a 𐀀 in *imy*.

The only alteration of the manuscript reading that has been allowed is the omission of signs repeated by dittography. Such repetitions have been left in their place in the main text only

if they are very short. Long repetitions, which would have caused an unwarrantable waste of space if they had been admitted to the text, have been relegated to the notes.

Damaged signs are hatched in those portions where they are defective, and as they have been restored only if the reading is probable or practically certain it seemed superfluous to spoil the neatness of the blank column by introducing signs indicative of probability or the like. The more doubtful readings are occasionally marked by a query, but for the most part they are given in the notes.

*Sic* has been used only rarely and, I am afraid, rather at haphazard. At any rate the absence of this symbol should never be a reason to doubt our readings.

Figures with an asterisk (1\*, 2\*, etc.) in the blank column to the right of any text column refer to the notes. These have, as far as possible, been given on the same page.

Dashes beside signs (|) mean that these signs were not seen by ourselves, but rest on some other authority—publication or manuscript copy. In the vast majority of cases the authority in question is the manuscript of M. Lacau referred to above. As most former copies or publications do not preserve the arrangement of the originals, my arrangement of the signs in these parts is wholly arbitrary.

The symbol † is employed to indicate that the signs or sentences separated thereby follow one another in the original without any break.

Sometimes a simple line | will be found. Such a line has no other intention than to guide the eye, for example, if a text starts near the bottom of a page, thus being far away from its designation in the heading of the page. If such a line occurs between words or groups of words, these do not follow one another immediately in the original.

The notes are very brief and have been confined to purely textual matters—corrections, erasures, and the like. Also, in the case of a complicated arrangement or disorder in the manuscript, they help the reader to visualize the original.<sup>4</sup>

This is also the purpose of the plans which have been given of manuscripts or parts of manuscripts having texts written in tabular form. These sketches are not drawn to scale and are only intended to give an idea of the real position and order of the lines. The plans are indexed on page 85. A statement of similar nature about coffin T2C is made on page 313.

The letters on the left-hand side of the page or of each group of parallel texts are meant to facilitate the quoting of the texts, which should in the editors' opinion be quoted by volume, page, and letter—for example, I 2 *a*, II 115 *c*, etc. In some respects I should have preferred a quotation by number of spell and letter, a quotation such as *Coffins* 75 *p* being more eloquent, if 75 be a well known spell, than *Coffins* I 100 *c* (100 being a page); just as BD (Ani) 125, 7 in my opinion is more eloquent than Budge (1898) p. 247, l. 2. Such a method proved, however, impossible, many spells being so long that the alphabet would not have been sufficient. The objection to quoting subdivisions by spell and number (instead of letter), or alternatively by page and number, for example I 104, 4, is that this yields two figures in succession, a course that would necessitate the use of a comma or some other symbol between the two figures and might be a source of mistakes. The method advocated here, which uses a Roman figure, an Arabic figure, and a letter, seems to be that which is least liable to confusion.

One point remains to be discussed. Our publication gives all the parallel texts of a spell in full. This course, which involved the publication of some very corrupt texts and of small and sometimes apparently useless fragments, may perhaps seem to require some justification. In the first place the aim of this enterprise has been not merely to give an edition of the text, but also to preserve the readings of the manuscripts, some of which, as M. Lacau's copies have made abundantly clear, have been very rapidly perishing. But further, anyone who has

<sup>4</sup> The abbreviation "gr." used in the notes stands for a "group" or "square" of text.

## INTRODUCTION

xv

seriously worked with Naville's *Todtenbuch*,<sup>5</sup> as the present writer did when he had the privilege of joining in Sethe's *Göttinger Totenbuchstudien*, will have had the experience that such study is much hampered by the fact that Naville gives only the more important variants. What exactly is the situation when Naville is silent? Is a parallel passage from which no variant is given really identical with the corresponding passage in the first column? Or has it a variant which in Naville's opinion was unimportant, but concerning which we might take a different view? Or is the manuscript defective at this point? If so, is the space sufficient for the version of the first column or not? In a word, a really sound study of a spell from the Book of the Dead must be continually going back from Naville to the originals. The student who uses our publication may have confidence that he has the whole material before him; and if a manuscript of exceptional interest is lost at crucial points (as is so often the case with Egyptian manuscripts) he at least knows his fate at once, and not as the disappointing result of long inquiries. For much the same reasons this method was adopted also by Lacau, who further emphasizes the interest of certain variants and even mistakes.<sup>6</sup>

Regarding the question as to which text should be given in the first column the present editor must confess a painful discrepancy between his lofty ideals and their poor realization in this volume. The ideal of course would have been to achieve a piece of real editing from the very beginning, to put the best or oldest text in the first column, to distinguish families of manuscripts, and to construct pedigrees. But it soon became clear that such a course was impossible without a delay of years. A study such as Sethe's *Totenbuchstudien* would have been the necessary preliminary to an edition of this kind, which will possibly be the ultimate outcome of the study of our volumes and which may even take the form of a printed text with notes like the edition of a classic. For the moment it has been possible merely to make the roughest distinctions, and to keep families of manuscripts together only if the mutual resemblance was very strong and the difference from others very striking. Nevertheless, some of the finer distinctions and family features have already become clear in the course of writing out the texts, and indeed some of them are obvious at first sight now that the texts are neatly arranged side by side. Often practical considerations have determined the choice of the text for the first column; often not the best text but the fullest text or the text occupying the most room has been deliberately chosen in order to avoid blank spaces in the first column. Perhaps these practical necessities have too often overruled what is theoretically the right or the best method. I myself am painfully conscious of the shortcomings of this publication. Some of the work which remains to be done, or has only partly been done in the course of compiling the text volumes, may be included in our volume of translations. The larger portion of it must necessarily be left for future generations of Egyptologists.

<sup>5</sup> *Das ägyptische Todtenbuch der XVIII. bis XX. Dynastie* . . . hrsg. von Edouard Naville (3 vols.; Berlin, 1886).

<sup>6</sup> Pierre Lacau, *Textes religieux égyptiens* I (Paris, 1910) 3. A regrettable consequence of this point of view was that Lacau did not continue his edition, because, as a note found with his manuscript copies tells us, he had come to the conclusion that his work would have been too incomplete without the important coffins in the European museums.

$\zeta$											
$\eta$											
$\theta$											
$\iota$											
$\kappa$											
$\lambda$											
$\mu$											
$\nu$											
$\xi$											
$\omicron$											
$\pi$											
$\rho$											
$\sigma$											
$\tau$											
$\upsilon$											
$\phi$											
$\chi$											
$\psi$											
$\omega$											

1\* The text of B15C is copied from Ms. Lacau  
 2\*  $\beta$  is corrected out of  $\beta$ . The scribe began to write Gb.  
 3\*  $\Delta$  may be hidden by the black band at bottom of lines.  
 4\* The ideogram of mks.

19

# Spell 2

	B3Bo	B2Bo	B4Bo	B1P	B15C	B6C	B4C	M.C.105	Y1C	S10C	FR.T.319
a											
b											
c											
											
											
											
											
											
											
											
											
											

1\* 41K this group  
often in this M.S.  
2\* & is added later.  
3\* 7 The scribe  
began to write mm,  
but saw his mistake  
in time and changed  
this to 7.  
4\* & cancelled by  
means of a red stroke.

## Spell 3

I 10

	B3Bo	B2Bo	B4Bo	B1P	B15C	B6C	M.C.105
a							
b							
c							
d							

	B3Bo	B2Bo	B4Bo	B1P	B15C	B6C	M.C.105
e							
f							
g							
h							

2\* is a later addition.

1\* See g.1\*

3\* The text of B15C is copied from Ms. Lacau.

I 11

# Spell 4

	B3Bo	B2Bo	B4Bo	B1P	B15C	B6C	B4C	M.C.105	YIC	S10C	T9C	Th.T.319
a												
b												
c												
d												
e												

M.C.105

1\* M.C.105 has a title in the horizontal band surmounting the texts. See 11f.

2\* Copied from Mr. Lee.

3\* The scribe began to write □.

4\* A correction.

5\* Thus

6\*

7\* The available space is not enough for if written as in l. 6 (9c).

8\* would probably fill the lacuna. For see l. 5 (8c).

I 12

Spell 4

	B3Bo	B2Bo	B4Bo	B1P	B15C	B6C	B4C	M.C.105	Y1C	S10C	T9C	M.T.319
a												
b												
c												
d												
e												

1\* This restoration fills the space exactly.  
 2\* Uncertain.  
 3\* End of foot.

I 13

# Spell 4

	B3Bo	B2Bo	B4Bo	B1P	B15C	B6C	B4C	M.C.105	Y1C	S10C	Th.T.319
a	↑	↑	↑	↑	↑	↑	↑ 	↑ 	↑ 	↑ 	↑ 
b	↑	↑	↑	↑	↑	↑	↑	↑ 	↑	↑	↑
c	↑	↑	↑	↑	↑	↑	↑	↑	↑ 	↑ 	↑ 
d	↑	↑	↑	↑	↑	↑	↑	↑	↑	↑	↑
e	↑	↑	↑	↑	↑	↑	↑	↑	↑	↑	↑

1\* The phrases of the parallel texts in a somewhat shorter form would fill the lacuna. Cf 22 b, c.  
2\* The restoration fills the space exactly.

Spell 4

- 1\* Spell 5 follows.
- 2\* Arranged thus  

- 3\*  fills the lacuna.
- 4\* Not more than one group.
- 5\* The spell which follows does not belong to the series.

I 15

f		
g		

	S1C	S2C
h		

	B1C	T1C <sup>4</sup>
i		
j		

1\* (S1C); certain. (S2C)

2\* see 84a (S5C, S12C)

3\* Hardly P.

4\* Beginning of line in archetype.

5\* It is not certain that this is really the title of Spells 30ff. In S1C there is another spell between the end of the series (p. 107c) and this title and in S2C that same spell is found after 83h. I prefer, however, to take 83d-h as title of Spells 30ff. because of the arrangement in S2C [83d-f precedes and 83g-h follows the series] and the meaning, which suits the contents of these spells well.

6\* In these MSS. Spell 33 precedes.

7\* This is title of Spells 33+30+31+32, see n. 6\*

I 84

d	↓	↓	↓	↓	///	↓	↓	↓	↓	↓	↓	↓	↓	↓

Notes of p. 106.

1\* End of head.

2\*  $\overline{\text{v}}$  added later.

3\* Corrected out of 11.

4\* Thus:  $\overline{\text{v}}$

1\* The spell which precedes 83d follows.

2\* Second part of title (83g) follows.

3\* Rest of l. probably empty: top of l8 contains the beginning of a spell. (82.68)

4\*  $\overline{\text{v}}$  incomplete  $\overline{\text{v}}$ ?

5\* Badly made; reading confirmed by better forms in B12C<sup>±</sup> 55, 60.

6\*  $\overline{\text{v}}$  seems inevitable.

$2^* \uparrow$  is a later addition.

$3^* B_{12}C^{\pm}$  is a repetition  
of the last ll. of  $B_{12}C^{\pm}$

After writing 168 d  
the scribe began to  
copy his original in  
the wrong direction.

At the end of l. 142 he saw his mistake and stopped. For the actual

lines of the MS. see the following notes and p. 168, 1<sup>\*</sup>-3<sup>\*</sup>.

Reconstruction of the  
original of B12C:

$B_{12}C^{\dagger} \leftarrow$

$$B \vee C^c \rightarrow$$

$4^* N_{\text{min}}$  in  $168^{\frac{1}{2}}$  precedes.

5\*168c iw ns'sr precedes.

1\* So Lacau,  
traces suit.  
2\* Traces suit well.  
3\* 

I 175

Spell 40

1\* End of texts on bottom.

2\* Traces

3\* Space suits, see l. 254.

4\* Traces suit, see l. 254.

5\* Space suits, see p. 171 j (l. 230)

6\* Space suits, cf l. 253

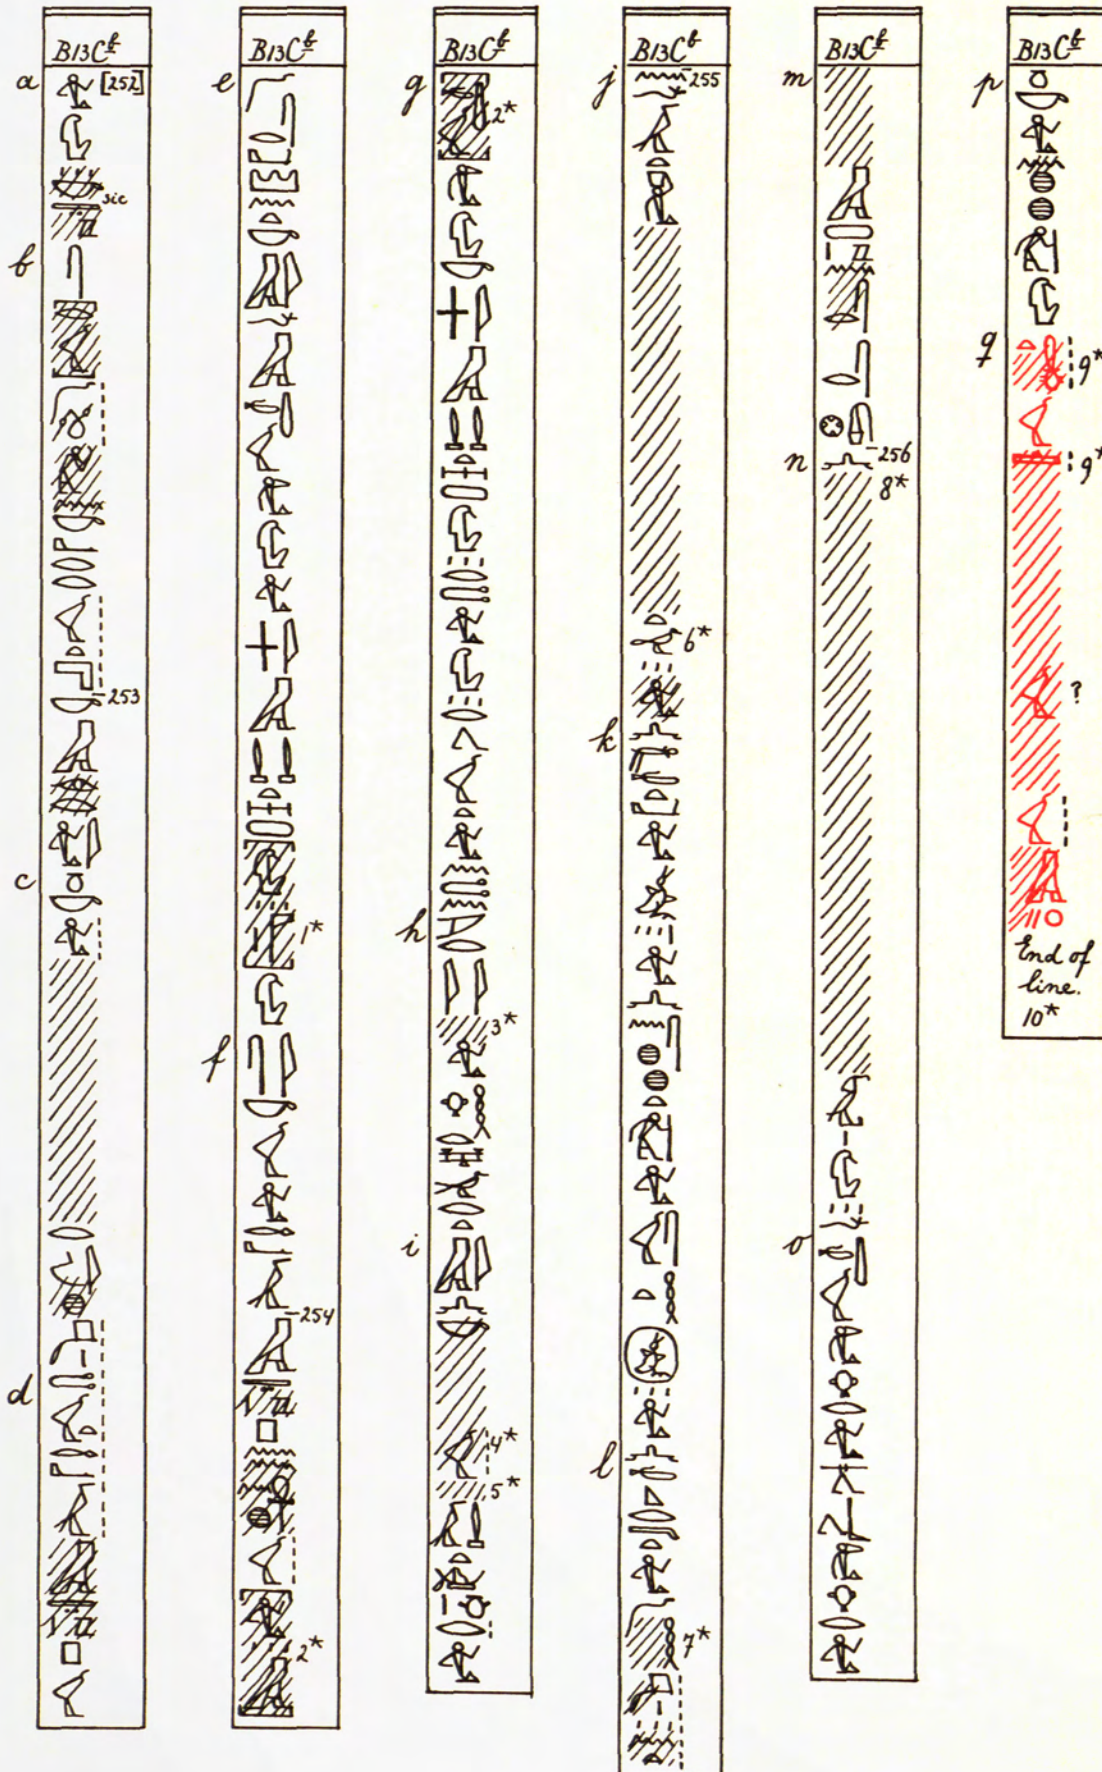

7\* So Lacau, tr. of head suits.

8\* So Lacau, querying every sign. Trace of looks probable, the other signs now totally lost.

9\* So Lacau. would take the rest of the lacuna.

I 176

Spell 40

- 1\* Lacau ~~W~~; read  
prob. ~~W~~. Space  
suits.
- 2\* For this  
restoration which  
fills the lacuna  
exactly of l. 254, 253.
- 3\* Restore   of l. 250.
- 4\* So Lacau; lower  
part of w (or m?)  
still visible.
- 5\* Lacau: ... or -
- 6\* Probable K
- 7\* Lacau X X
- 8\* Lacau gives  
the beg. of l. 256  
as follows: ...  
X X X X ...  
X X X X ...  
X X X X ...  
length of  
lacunae uncertain.
- 9\* So Lacau, traces  
suit.
- 10\* End of front.

I 177

Spell 41

- 1\* Text or section of text [Spell 40] occupying the upper part of ll. 241-246. For the tabular form see the plan. Much of the text can be restored with help of pp. 163, 164.
- 2\* For restoration see 163 b?
- 3\* Restore ns.t.k with 163 c.
- 4\* Restore with help of 163 f.
- 5\* See 163 g.
- 6\* Restore with help of 163 j.
- 7\* Probable, L
- 8\* For restoration cf. 164 e.
- 9\* So Lacau, read □?
- 10\* Restore with help of 164 f.
- 11\* For restoration see 164 f?  
aa looks so.

Notes

Page 201.

- 1\* So lacun, traces suit. Space not sufficient for  $\overset{!}{\circ}$ .
- 2\*  $\circ$  seems impossible. A corruption therefrom?
- 3\* large  $\hookleftarrow$ .
- 4\*  $\downarrow$  exactly like  $\downarrow$  L.63 [202 d]
- 5\*  $\uparrow$  exactly like  $\uparrow$  L.45 [198 b]
- 6\*  $t_2$  to  $t_3$  in 200 a follows.
- 7\*  $shd$  in 201 h precedes.
- 8\* Doubtful,  $\circ$ .
- 9\* Or else  $\rightarrow$ .
- 10\*  $Mrf$  in 200 d follows.
- 11\*  $Atum$  202 b precedes.
- 12\*  $3\&4$  201 a follows.
- 13\*  $np$  in 202 f precedes.
- 14\* See A.

Reconstruction of original of B16C.

Page 202.

- 1\* Or else  $mm$ .
- 2\*  $\hookleftarrow$  hardly  $\hookrightarrow$ ; hieratic  $\square$ ?
- 3\* After the mark of division  $\circ$   
after N rest of l. empty.  $\downarrow$   
Next l. Spell 47 follows.  $\downarrow$   
 $N$
- 4\*  $itf$  in 201 e follows.
- 5\*  $mmw$   $ntrw$  204 b precedes.
- 6\* My text assumes that the words  $mmw$   $ntrw$  which precede  $iw$   $gr$  etc. were the end of a l. in the original of B16C and that  $mm$   $ntrw$  which precedes  $\text{K}$  (204 c) was a dittogr. of this original due to changing line. The alternative is to take  $mmw$   $ntrw$  as beginning of an original line. In this case these words would correspond to  $mm$   $ntrw$  of 202 c. and  $mm$   $ntrw$  preceding  $\text{K}$  would not be dittogr. The former supposition seems preferable, because it yields lines of more equal length.
- 7\*  $Rnpw$  in 201 h follows.
- 8\* The line which followed in the original of B16C began with a dittogr. due to changing line. See the reconstruction.

Page 209.

- 6\*  $hr$   $ws.t$  in 208 c follows. 12\*  $z$   $imntjw$  in 209 b follows.
- 7\* 209 f precedes.
- 8\*  $\hat{I}$  looks like  $\hat{D}$  or sim. 13\*  $Photh$  in 210 e precedes.
- 9\*  $\bar{I}$  incomplete  $\bar{I}$ ?
- 10\*  $us$  208 e follows.
- 11\*  $iur$  in 210 b precedes.

2\* I must be meant.

3\* Arranged thus:

4\* The original inserts after im.k

5\* The original continues

The explanation of this text seems to be that the original of TqC repeated the whole of c (ditto) and then continued with the full text of d and e and that TqC omitted a line of this original. For these ll. which have about the length of the supposed omission see 293, 1\*, 294, 2\*.

\* Trace suits mm,  
not .

Note on foot of T2C.

This side of T2C is divided into two registers surmounted by horizontal title-sections. The title above the upper register (ll. 23-46 = p. 301 ff) reads:

[illegible]

The title surmounting the lower register (ll. 48-71 = p. 306 ff.) reads:

(47) በገዢው ስር ይሰራል፡

Spell 75

1\* Or  $\uparrow$ ;  $\uparrow$  an intermediate form.

2\* Original arrangement  $\uparrow$ .

3\*  $\Delta$  probable. Chiselmark -.

4\* The chiselmarks look in both cases like  $\Delta$  ( $\Delta$ ).

5\* This is l.5 of the fragment (not of the side) It is impossible to locate what remains of the first 4 ll.

6\* Probably without  $\Delta$ , as M23C.

7\* M-Ann.  $\uparrow$

8\* M-Ann.  $\uparrow$

9\* M-Ann.  $\uparrow$

10\* M-Ann.  $\uparrow$

11\* The signs are arranged thus  $\uparrow$ .

12\*  $\Delta$  rather different from  $\Delta$  (l.g.) and the space available is too much for  $\Delta$ , if written as in l.g. Still  $\Delta$  (with a different and larger form of  $\Delta$ ) seems a certain restoration.

## Spell 75

1\* The second  $\rightarrow$  is added later.

2\*  $\equiv$ , a corruption of a cursive form of  $\overline{\text{se}}$ .

3\*  $\circ$  doubtful, the sign is a small  $\Delta$  like  $\Delta$ .

4\* Original arrangement  $\text{st}$

5\* In the original the  $\text{st}$  signs are arranged  $\text{st}$ .

6\* Original arrangement thus  $\text{st}$ .

7\* End of fragment.

## Notes of p. 384.

1\*  $\text{b}$  like  $\text{b}$ ; it is an incomplete  $\text{b}$  ( $\text{Y}$ ).

2\*  $\equiv$  must be meant.

3\* Read  $\text{GP}$ . My reconstruction, which assumes that  $\text{bft}$   $\text{mdw}$   $\text{ntr}$  corresponds to  $\text{hr}$   $\text{prt}$   $\text{m}$   $\text{r}$   $\text{n}$   $\text{ntr}$ , suits the length of ll. 123, 124 admirably.

4\* See 377, 2\*

## Notes of p. 385.

1\*  $\square$  is a correction, probably over  $\rightarrow$ .

2\* Sic. A corruption of  $\text{mll}$ .

3\* End of top.

4\*  $\text{K}$ , an obscure animal.

5\* See 377, 2\*.

## Notes of p. 386.

1\*  $\text{P}$ , perhaps  $\text{PR}$ ?

2\* The reconstruction of M23C indicated by the hatching here and 387a is of course very uncertain.

## Notes of p. 387

1\*  $\rightarrow$  seems certain:  $\text{st}$ .

2\* Mechanical copy of a double column.

3\* The  $\text{st}$  is incomplete  $\text{st}$ .

4\* Original  $\text{st}$ , see 388a.
